Nguyễn Việt Hoàng

.NET Developer

0868248696
codercodern2001@gmail.com
Hanoi, Vietnam

OBJECTIVE

Motivated .NET Developer seeking to contribute clean, scalable, and maintainable code to impactful software projects. Eager to collaborate in agile teams, enhance user experience, and continuously improve through hands-on learning.

WORK EXPERIENCE

🏢 **NCCPLUS Vietnam JSC — *Fresher Developer***

📅 *Mar 2022 - Apr 2023*

Full-Stack Developer

- Built core modules for internal systems including HRM, ERP, CRM, and TimeSheet management
- Collaborated with Business Analysts to define requirements and deliver features in Agile sprints
- Wrote unit tests, participated in code reviews, and managed deployments via Azure DevOps
- Contributed to an outsourcing project for a New Zealand client, developing cross-team features
- Technologies: **ASP.NET Core**, **ABP Framework**, **AngularJS**, **VueJS**, **.NET MAUI**, **Azure DevOps**

🏢 **Windsoft Vietnam Technology JSC — *Junior Developer***

📅 *Apr 2023 - Dec 2024*

Full-Stack Developer

- Developed backend APIs and dashboards for branch coordination and service management systems
- Participated in CI/CD workflows: source control, versioning, and production deployment
- Integrated 3rd-party services (e.g.,VietQR, Goong Maps, ZaloPay) for e-commerce and booking systems
- Actively contributed to business analysis and database design
- Technologies: **ASP.NET Core**, **ASP.NET MVC**, **SQL Server**

🏢 **NashTech Vietnam — *Middle Developer***

📅 *Feb 2025 - Present*

Software Engineer

- Collaborating in Agile Scrum teams to deliver enterprise-scale solutions across insurance and ERP domains
- Working on a **monolithic system** built with **ReactJS**, **.NET Core**, and **.NET Web API** for ERP and project management
- Contributed to integration with **Deltek Vantagepoint** and designed backend services to support project synchronization and reporting
- Participating in a **microservices-based** insurance and payment system utilizing **Clean Architecture (Vertical Slicing)** and **Minimal APIs**
- Hands-on with **Data Warehouse** architecture for analytics, historical data sync, and reporting pipelines
- Engaged in requirement analysis, sprint planning, API design, code review, and team knowledge sharing
- Technologies**: .NET Core, .NET Web API, ReactJS, SQL Server, Clean Architecture, Minimal API, Agile Scrum**

PROJECTS

NCC ERP Management Software *(NCC Plus)*

Full-stack developer (Backend-Focused)

👥 **Team size**: 8

📅 *May 2022 - Nov 2022*

📝 **Description**:
An internal ERP solution managing HR, project progress, team performance, and integrations with CRM and TimeSheet systems.

✅ **Contributions**:
- Developed core features using **ABP Framework** and maintained backend services in **ASP.NET Core**
- Wrote unit tests and collaborated with Business Analysts to clarify requirements
- Managed CI/CD deployment processes using **Azure DevOps**

💻 **Technologies**: ABP Framework, ASP.NET Core, AngularJS, SQL Server

UCG Project Management Software *(NCC Plus)*

📅 *Nov 2022 - Mar 2023*

Full-stack developer

👥 **Team size**: 14 (Vietnamese staff)

📝 **Description**:
Business management platform for a leading New Zealand telecommunications company, built to manage customer segments, projects, tasks, and internal collaboration via web and mobile platforms.

✅ **Contributions**:
- Developed assigned features across both frontend and backend components
- Built layout pages for the management dashboard using **AngularJS**
- Designed mobile app interfaces and implemented APIs using **.NET MAUI** and **ASP.NET Core**

💻 **Technologies**: Xamarin, .NET MAUI, ASP.NET Core, AngularJS

Care House Project *(WindSoft)*

📅 *Apr 2023 - Nov 2023*

Full-stack developer

👥 **Team size**: 8

📝 **Description**:
Service booking platform connecting customers with cleaning and repair providers via web and mobile apps.

✅ **Contributions**:
- Participated in business requirement analysis and database design
- Developed admin dashboard pages using **ASP.NET MVC**
- Designed and implemented REST APIs for mobile and web clients
- Wrote technical documentation and unit tests to ensure quality

💻 **Technologies**: ASP.NET MVC, ASP.NET Web API, SQL Server

TNT Security Project *(WindSoft)*

📅 *Aug 2023* - Dec 2023

Full-stack developer

👥 **Team size**: 5

📝 **Description**:
A security guard rental platform enabling clients to manage service requests, guard assignments, and related business workflows.

✅ **Contributions**:
- Participated in requirement analysis and relational database design
- Built admin dashboard modules using **ASP.NET MVC**
- Developed and integrated APIs for web and mobile applications
- Wrote unit tests and internal documentation for service reliability

💻 **Technologies**: ASP.NET MVC, ASP.NET Web API, SQL Server

ShopShip Project *(WindSoft)*

📅 *Dec 2023 - Dec 2024*

Backend developer

👥 **Team size**: 10

📝 **Description**:
An e-commerce MiniApp on Zalo that offers services such as booking, ride-hailing, delivery, and food ordering — focusing on user convenience and integration of various service modules.

✅ **Contributions**:
- Designed scalable backend APIs and supported cross-platform data synchronization
- Built admin dashboard features and managed versioning for multiple service modules
- Integrated 3rd-party services like **ZaloPay**, **Goong Maps**, and **ElasticSearch**

- Handled CI workflows, including code merging, deployment, and release versioning

💻 **Technologies**: ASP.NET MVC, ASP.NET Web API, SQL Server

Atlanta Project *(NashTech)*

📅 *Feb 2025 - Sep 2025*

Backend Developer

👥 **Team size**: 12+

📝 **Description**:

An enterprise finance and insurance system for a UK client, responsible for integrating data with government APIs (e.g. Justice) and managing policy-related operations. The project follows a **microservices architecture** with a strong focus on performance, scalability, and clean design.

✅ **Contributions**:

- Designed and implemented REST APIs using **.NET Minimal API** and **Clean Architecture (Vertical Slicing)**
- Integrated and mapped third-party services (e.g., Justice API) to internal models with frontend compatibility in mind
- Wrote comprehensive **unit tests**, **functional tests** (ReqnRoll), and **performance tests** using **K6** and **BenchmarkDotNet**
- Actively participated in Agile ceremonies, code reviews, and service integration discussions
- Collaborated with the frontend team to ensure API contract alignment and smooth validation

💻 **Technologies**: .NET Core, .NET Web API, Minimal API, Angular, Docker, Microservices, K6, ReqnRoll, BenchmarkDotNet

SLR Sustain Project *(NashTech)*

📅 *Oct 2025 - Dec 2025*

Full-stack Developer

👥 **Team size**: 20+

📝 **Description**:

An ERP platform for project lifecycle management, contract tracking, and integration with **Deltek Vantagepoint (VP)**. The project is built on a **monolithic, well-structured architecture**, following clean code principles and incorporating data warehousing for analytics and reporting.

✅ **Contributions**:

- Developed and maintained backend services using **.NET Core** and **.NET Web API**
- Implemented core modules for project synchronization with VP, contract management, and workflow logic
- Built and integrated frontend components using **ReactJS**
- Designed and executed **unit tests** to ensure system correctness and reliability
- Contributed to the **Data Warehouse architecture**, supporting business intelligence and reporting needs
- Collaborated in sprint planning, API design, and system architecture discussions

💻 **Technologies**: .NET Core, .NET Web API, ReactJS, Clean Architecture, SQL Server, Data Warehouse

SLR SEG Project *(NashTech)*

Jan 2026 - Present

Full-stack Developer

👥 **Team size**: 20+

📝 **Description**:

A **microservice-based** transaction management application used to manage core business entities within a larger distributed system. The solution follows **Clean Architecture** principles, with a separated backend and frontend, and supports **API-driven workflows**, validation, and persistence through SQL Server.

✅ **Contributions**:

- Developed and maintained backend services using **.NET 10**, **ASP.NET Core**, and **MediatR**
- Designed and extended the frontend using **React 19**, **Vite**, and **TypeScript**
- Integrated frontend and backend through RESTful APIs with consistent request/response validation and error handling

- Applied **Clean Architecture** across Core, Application, Infrastructure, API, and ClientApp layers
- Worked with **Entity Framework Core** and **SQL Server** for data persistence, model configuration, and migrations
- Supported **cross-service** interactions as part of a broader microservices ecosystem
- Contributed to **unit-test-friendly** code structure and maintainable feature modules

💻 **Technologies**:
.NET 10, ASP.NET Core Web API, MediatR, Entity Framework Core, SQL Server, React 19, TypeScript, Vite, Clean Architecture, REST APIs, Tailwind CSS

EDUCATION

🗓️ *Oct 2019 - Jun 2023*

Bachelor of Computer Science

Hanoi University of Industry

- Strong foundational knowledge of object-oriented programming and system design.
- Gained knowledge in AI, web development, and database systemst.
- Teamwork and project-based learning in academic settings

🗓️ *Oct 2020 - Feb 2023*

Diploma in Information Systems Management

FPT - APTECH (FPT International Training Institute)

- Completed 4-semester hands-on training program in software development
- Built full-stack projects using modern web and mobile technologies
- Technologies used: PHP, Laravel, ASP.NET MVC, ReactJS, Spring Boot, MySQL, SQL Server

*(See project details in my **GitHub** link above)*

SKILLS

Programming Languages

C#, Java, JavaScript, TypeScript

Backend Frameworks & Technologies

- ASP.NET Core, ASP.NET Web API, ASP.NET MVC
- Entity Framework, ABP Framework
- Minimal API, Clean Architecture (Vertical Slicing), Cloud-integrated API design
- Spring Boot
- Experience with serverless architecture and event-driven design (AWS)

Frontend Frameworks

ReactJS, AngularJS, Bootstrap

Mobile Development

.NET MAUI, Xamarin

Databases & Data Platforms

- SQL Server, MySQL, Azure SQL
- Data Warehousing (ETL, reporting architecture)

DevOps & Tools

Azure DevOps, Git, CI/CD, Trello, Jira, GitHub

Cloud & Integrations

- AWS (Lambda, API Gateway, S3, DynamoDB, IAM, CloudWatch)
- Azure Services (App Services, Azure SQL, CI/CD Pipelines)
- ElasticSearch, ZaloPay Integration

English Proficiency

- Able to communicate in English
- Strong ability to read and understand technical documentation
